# Company Vision

*Become a leading technology partner that inspires innovation and digital transformation through reliable and advanced integrated solutions.*

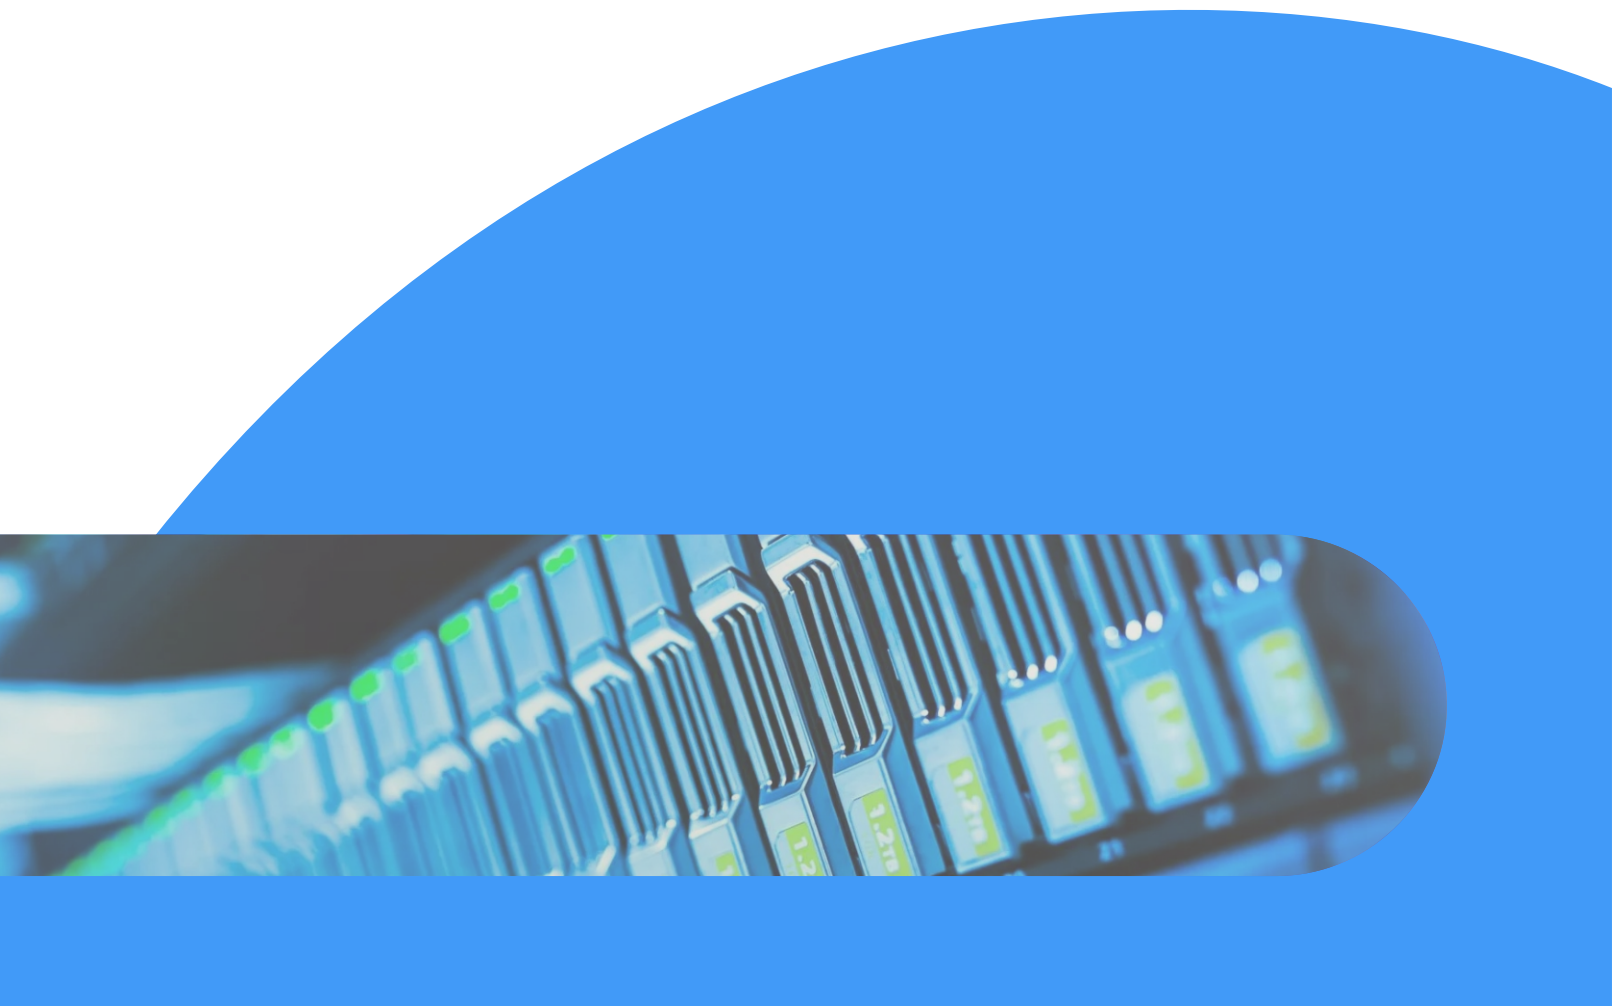

# Company Mission

Provide comprehensive and high-quality technology solutions in LAN installation, data center management, application development, and CCTV systems, to support our clients' business success.

Integrate the latest technology with an adaptive and customer-centric approach to meet our customers' needs and expectations in an efficient and effective manner.

Building long-term relationships with our customers through superior service, responsive technical support, and continuous innovation in every project we undertake.

Committed to creating an inspiring work environment for our team, encouraging professional development, and fostering a spirit of collaboration and creativity.

# Our Services

## IT INFRASTRUCTURE

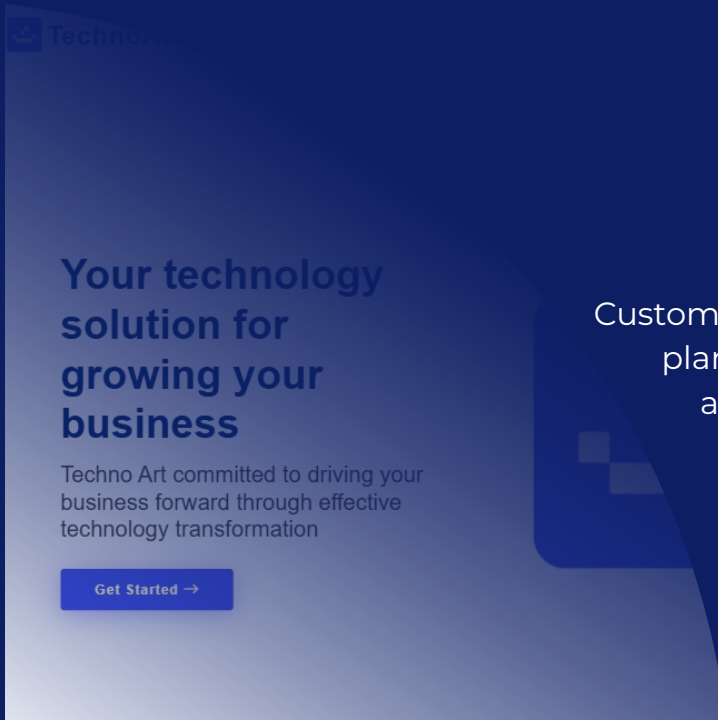

The Hardware Procurement and Installation Services as well as IT Infrastructure Management and Maintenance include the procurement of necessary IT hardware, device installation, as well as monitoring, routine maintenance, and technical support to ensure optimal performance and operational continuity of the IT infrastructure.

## CUSTOM APPLICATIONS

App Development Services include the design, development, and integration of applications tailored to the client's needs, with platform options for web, mobile, or desktop, to provide optimal and functional solutions that align with business goals and end-user requirements.

## CUSTOM WEBSITE

Custom Website services include responsive design planning, development of website functionality according to business needs, and integration of custom features to provide unique and optimal solutions for clients.

## CCTV

CCTV Installation and Maintenance Services include the procurement, installation, and maintenance of CCTV systems tailored to the client's security needs, whether for commercial or residential areas, with remote monitoring support and routine maintenance to ensure the system operates optimally.

# Why Choose Us?

**We are your trusted partner for custom solutions built on years of experience**

- ✓ Trusted systems are supported by a team of technical professionals to ensure reliable output of our products
  - ✓ Provide high-quality customer support.
  - ✓ Provide custom-built solutions specifically designed to meet your unique needs.
  - ✓ Competitive Pricing, Get the best value for your investment without compromising on quality.
- 

# What We Do?

*We provide comprehensive solutions ranging from IT infrastructure, custom website and application development, to CCTV systems, ensuring your business's technology and security needs are met optimally.*

## **IT Infrastructure**

Procurement, installation, management, maintenance, and technical support to ensure optimal IT performance.

## **Custom Website**

Responsive design, website functionality development, and integration of custom features to meet business needs.

## **Custom Applications**

Procurement, installation, maintenance, and remote monitoring of CCTV systems for commercial and residential security.

## **CCTV**

Design, development, and integration of applications tailored for web, mobile, or desktop platforms.

# Our Project

## Network Installation

### Router Mikrotik Setup:

Installation and configuration of Mikrotik, including routing setup, firewall configuration, and IP addressing.

### Bandwidth Management:

Fair bandwidth allocation, Quality of Service (QoS) configuration, and traffic shaping to ensure optimal performance.

### Wi-Fi Setup:

Installation and configuration of a secure Wi-Fi network with range optimization and security settings.

### Website Blocking:

Configuring the router to block access to specific websites to enhance security and productivity.

## Custom Payment App

The project aims to develop a payment solution fully customized to the specific needs and requirements of the client, utilizing on-premise servers to ensure full control over data and enhance security, while also being equipped with real-time transaction tracking features to support transparency, efficiency, and accuracy in the payment process, thus providing clear visibility for users and management regarding the flow of transactions.

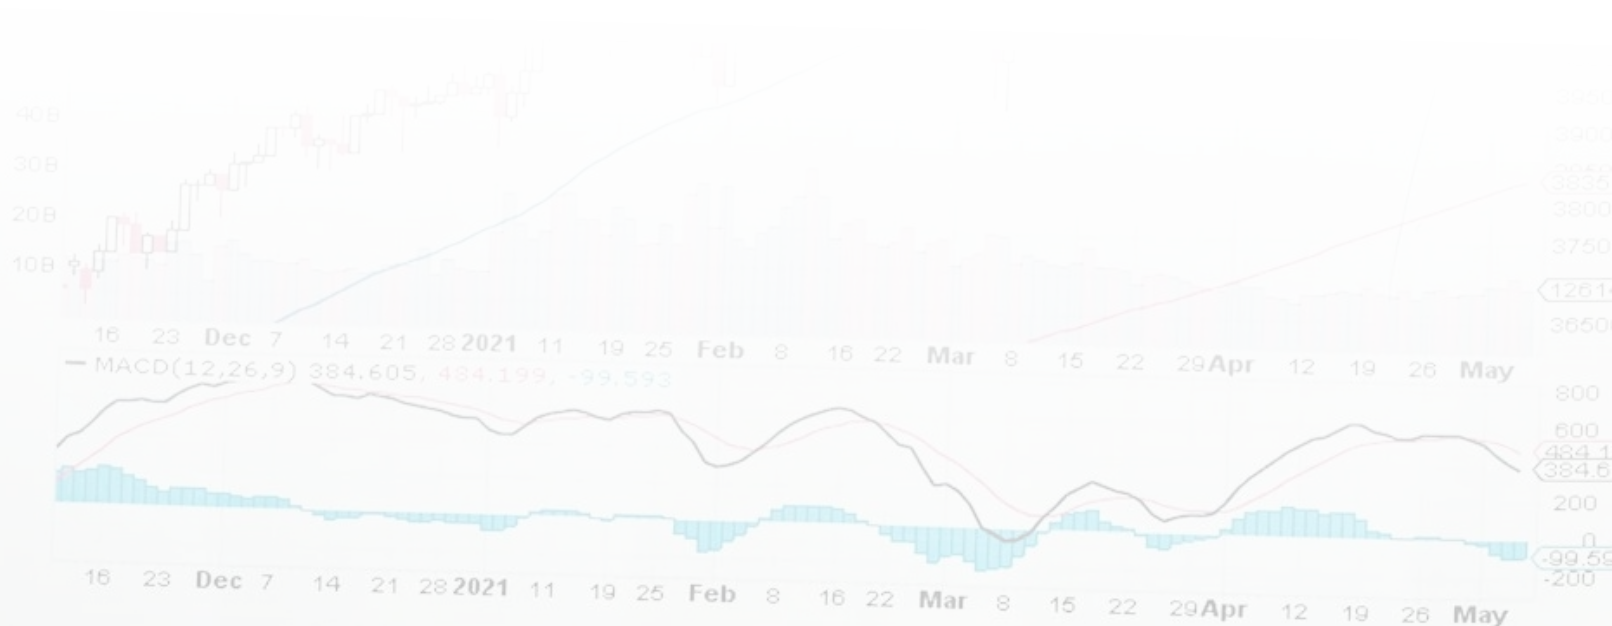

*Our project is not just about creating solutions; it's about building partnerships, understanding unique needs, and delivering customized, secure, and transparent systems that empower businesses to thrive in an ever-evolving digital landscape.*

# Growth & Strategy

*At Techno Art, we are committed to driving sustainable growth by continuously evolving our offerings and adapting to the ever-changing technological landscape.*

*Our growth strategy focuses on innovation, expanding our market presence, and delivering tailored solutions that meet the unique needs of our clients.*

*By focusing on these key areas, we aim to enhance our competitive edge and build long-lasting relationships with businesses across industries.*

## ● Product Innovation

Focus on research and development (R&D) to create the latest application solutions and technologies that are more efficient and aligned with market trends. Developing innovative products that address new business challenges, such as automation, artificial intelligence (AI), and cloud-based technologies, will provide significant value to clients and enhance the company's competitiveness.

## ● Service & Market Expansion

Expand network and application services to cater to a broader market, both geographically and across industries. This could involve opening new branches in different regions or introducing services to industries that have yet to be explored, such as education, healthcare, or e-commerce, to broaden the scope and strengthen the client portfolio.

## Thank You :)

*We would like to express our sincere gratitude for your attention and trust in Techno Art. We are committed to continuously providing the best technology solutions to support the success of your business. Please feel free to contact us if you need further information or wish to begin a collaboration.*

*We are ready to help you achieve your business goals with innovative and reliable technology.*
